MINDFULNESS IN MOTION

Sacred Space will help you to experience the dynamic aliveness of your inner and outer space.

Through landing consciously in the depths of our bodies we release natural movement which arises from inside. By inhabiting the living 'land' of our bodies, we find a ground of being and a resource of energy. When we are full and alive in ourselves, and when our circle is whole, we can connect creatively with the world around us and with the oasis within.

Sacred Space will give you tools to learn how to live from your integrity (wholeness) in all your relationships, with yourself, others, the environment, the ancestors and spirit world, and the tangible presence of the divine.

This connection to Sacred Space gives us access to embodied spirit and dancing prayer.

Ya'Acov Darling Khan is one of the founders of Movement Medicine. He has studied with healers and shamans from the Amazon to the Arctic Circle and is co-author of Movement Medicine- How to Dance, Awaken, and Live your Dreams.
